

2016 BAJA SAE SPONSORSHIPS

HIRE THE BEST

Finding the brightest, most promising engineering students for your organization can be time consuming and costly. Each year, over 8,000 students participate in the SAE Collegiate Design Series (CDS) North American competitions. Watch first hand as CDS participants are challenged by the hands-on team experience while they gain budgeting, communication, time, production and resource management skills. These are among the top skills most valued by today's innovation organizations. Support the future engineering workforce through SAE Collegiate Design Series competitions!

BAJA SAE challenges engineering students to design and build an off-road vehicle that will survive the severe punishment of rough terrain. As in real work situations, these future engineers work together as a team to discover and resolve technical challenges in design, test, and manufacturing, as well as business issues. The most rugged of all the competitions, Baja SAE also gives students the first-hand challenge of pursuing their passion while managing real-life demands and priorities. Each team's goal is to design and build a prototype of an all-weather, rugged, single-seat, off-road recreational vehicle intended for sale to the nonprofessional weekend off-road enthusiast. Connect to over 3,000 students during the 3 regional competitions each year with a value-added sponsorship that fits your company's recruiting and branding goals.

CELEBRATING 40 YEARS!

BAJA SAE[®]

Sponsors will have until October 1, 2015 for First Right of Refusal for the 2016 sponsorship they supported in 2015*
